## How to get CANopen Configuration Tool to work with Peak USB-CAN interfaces

Make sure you are following these steps:

 In LocalHWInterface.xml (the default path on Windows 10 is C:\Users\Public\Documents\ CANopenConfTool\LocalHWInterface.xml) find the line with the tag <driver> and copy
PeakLibPlugin from the <supported> list above as the value of the tag, i.e.
<driver>PeakLibPlugin</driver> and save the file.

🔚 LocalHWInterface.xml 🗵

98	🛱 <sur< th=""><th>ported&gt;</th></sur<>	ported>				
99	Ca	storRS232Plugin				
100	Ca	storUSBPlugin				
101	K/	ASERlibPlugin				
102	Ve	ctorLibPlugin				
103	Pe	akLibPlugin				
104	Ca	storRS232CEPlugin				
105	Ca	storUSBCEPlugin				
106	K/	ASERlibCEPlugin				
107	- <th>pported&gt;</th>	pported>				
108						
109	</th <th><pre>example:KVASERlibPlugin&gt;</pre></th>	<pre>example:KVASERlibPlugin&gt;</pre>				
110						
111	<dri< th=""><th>.ver&gt;<mark>PeakLibPlugin</mark></th></dri<>	.ver> <mark>PeakLibPlugin</mark>				
112	- <th>lwaredriver&gt;</th>	lwaredriver>				

- Plug in your Peak hardware to your machine. Also make sure you have the Peak driver for Windows installed.
- Start ConfTool and click Scan Bus.
- No valid license will be found, but you will see a serial number printed out.

[2020-01-14 08:16:27] Listening for Active CANopen nodes at bitrate 250 kbps [2020-01-14 08:16:27] Err: No valid license found for CAN-interface with serial number: 2293803665 Please add your license to License txt or contact info@tke fi for license! [2020-01-14 08:16:27] Err: Couldn't found valid license: No license found [2020-01-14 08:16:27] Searching for CFG Files and matching DCF Files No license found No license found [2020-01-14 08:16:27] Configuration ended. [2020-01-14 08:16:27] Err: Auto configuration failed. No license found							

• Send us this serial number. We will generate a license key and send it to you.

Once you have received the license key:

- Copy the license key into **License.txt** and save the file (C:\Users\Public\Documents\ CANopenConfTool\License.txt).
- Click the Play button and then Scan Bus. Your Peak device should now be recognized as licensed hardware. If this does not work, try restarting ConfTool.
